Founded in 2002 by Nobel Laureate Carl Wieman, the PhET Interactive Simulations project at the University of Colorado Boulder creates free interactive math and science simulations. PhET sims are based on extensive education <a {0}>research and engage students through an intuitive, game-like environment where students learn through exploration and discovery.

Build an Atom Lab! - PhET Contribution

Build an Atom Game Remote Lab: Description PhET games can be used for inquiry learning or practice. This lesson has some guidance for learning and practice. Learning Goals: Students will be able to Make atom models that show stable atoms or ions.

Build an Atom Game Remote Lab - PhET Contribution

Explore the Build an Atom simulation with your group. As you explore, talk about what you find. List two things your group observed in the simulation. Click on the + sign for each of the boxes (element name, net charge and mass number) to view changes as you change the number of particles in the atom. What particle(s) are found in the center of the atom? Play until you discover which particle(s) determine(s) the name of the element you build.
