Qualitative research is best suited to identifying how people think about problems, how they interact with products and services, and what encourages them to behave a certain way. For example, you could run a study to better understand how people feel about a product they use, or why people have trouble filling out your sign up form.

A beginner's guide to qualitative and quantitative research

Your research question guides your study and determines whether you are going to use a quantitative or qualitative research methodology. It reflects the direction and epistemological underpinnings of your research path. Both methodologies have merit, but you need to decide which one is more appropriate to use for your specific research problem.
