Oracle SQL & PL/SQL: How to Check Indexes on a Table
Note that associative arrays were known as PL/SQL tables in Oracle 7, and index-by tables in Oracle 8 and 8i. Their names were changed to associative arrays in Oracle 9i release 1. An associative array can be indexed by numbers or characters. Declaring an associative array is a two-step process. First, you declare an associative array type.

Oracle PL/SQL Associative Arrays By Practical Examples
Oracle Database represents the index expression as a virtual column, on which the ANALYZE statement (described in Oracle Database SQL Language Reference) can build a histogram. A function-based index precomputes and stores the value of an expression.

Using Indexes in Database Applications - Oracle Cloud
If you omit the partition names, then Oracle Database assigns names of the form SYS_Pn. GLOBAL PARTITION BY RANGE Use this clause to create a range-partitioned global index. Oracle Database will partition the global index on the ranges of values from the table columns you specify in the column list. See Also:

CREATE INDEX - Oracle Cloud
PL/SQL is a procedural language designed specifically to embrace SQL statements within its syntax. PL/SQL program units are compiled by the Oracle Database server and stored inside the database. And at run-time, both PL/SQL and SQL run within the same server process, bringing optimal efficiency.

PL/SQL for Developers - Oracle Cloud
In line 3 the PL/SQL TABLE is defined as being INDEXED BY BINARY_INTEGER . In line 4 a variable was defined as the collection, but the collection was not initialized. Next, a cursor is used to load the current book titles into the collection, and the indexed value was increased by 5 each time a value was added.

PL/SQL Table - Burleson Oracle Consulting
Index by table having two parts, these are value field and key field. In value field, oracle server stores actual data, where as in key field oracle server stores indexes, that's why index by table having 'key value' pairs and also indexes are by default integers, and these indexes are in between negative to positive numbers.

PL/SQL Index by tables (or) PL/SQL ... - Oracle Appplications
By default, the CREATE INDEX statement creates a btree index. When you create a new table with a primary key, Oracle automatically creates a new index for the primary key columns. Unlike other database systems, Oracle does not automatically create an index for the foreign key columns.

Oracle CREATE INDEX - Creating Indexes for One or More Columns
Re: pl-sql query with index by table 736609 Nov 24, 2009 2:05 PM (in response to Nikhil Juneja) I want to display names of the employees,still I have to write select count(*) Actually I am naive about Pl-SQL.

pl-sql query with index by table | Oracle Community
Oracle SQL Developer is a free, development environment that simplifies the management of Oracle Database in both traditional and Cloud deployments. It offers development of your PL/SQL applications, query tools, a DBA console, a reports interface, and more.

Oracle SQL Developer
With the release 9iR2, Oracle changed the name of the index by tables into associative arrays, as they were more like an array in structure and also allowed them to be indexed by either PLS_INTEGER, BINARY_INTEGER or VARCHAR2 data types. By allowing us to index by string, the associative arrays are far more flexible than the other two types with more real-time use in our applications.

PL/SQL associative array examples - dba-oracle.com
An Oracle PL/SQL collection is a single-dimensional array; it consists of one or more elements accessible through an index value. Collections are used in some of the most important performance optimization features of PL/SQL, such as

Working with Collections | Oracle Magazine
Oracle Tutorial. Oracle is a relational database technology developed by Oracle.. PLSQL stands for "Procedural Language extensions to SQL", and is an extension of SQL that is used in Oracle.PLSQL is closely integrated into the SQL language, yet it adds programming constructs that are not native to SQL. Our tutorial will start with the basics of Oracle such as how to retrieve and manipulate data.
